

Slow Release Watering Bag 55 l

The TBA irrigation Bag is the ideal watering solution thanks to its water drainage method. In contrast to normal watering, where the water cannot reach deep into the soil, this bag releases water gradually and only around the trunk, allowing it to reach the roots of the tree. The bag is placed around the trunk, fastened with a zipper and filled with water. Depending on the diameter of the tree trunk, the bag can hold between 50 and 75 liters of water, which is released over a period of 3 to 8 hours. The TBA irrigation bag is ideal particularly for dry or newly planted trees. Only clean, dirt-free water must be filled into the bags to avoid clogging the drainage holes.

Product code: 963506

Number of pieces on the pallet: 900

Number of pieces in the package: 30
