

Protective cover of IBC container 1000 I

Do you want to prevent green algae from forming in the tank, make your tank last longer and be protected? The ideal solution is a protective cover.

The outdoor protective tarpaulin is designed for a 1000 liter IBC rainwater tank. It protects your water tank from corrosion, is resistant to water, dust and increases the life of your IBC container.

A high-quality tarpaulin protects the outdoor IBC water tank. It effectively protects your water tank from dirt, wind, and rain all year round. It prevents the access of UV radiation.

Thanks to the small cutouts in the foil for the tap and lid, the covered rainwater tank can be used all year round. However, it is not recommended to leave the packaging on the tank in the cold (winter) - its service life is reduced.

The tarpaulin is made of polypropylene. This material is extremely stable, resistant and durable.

Product code: 960010

Number of pieces on the pallet: 100

Technical specification

Features:

Colour	green
Material	PP
Weight	1.42 kg

Dimensions

Length	120 cm
Width	100 cm
Height	116 cm
